SHOPFITTING SYSTEM

WINE & SPIRITS

Enter a world of special delights

WINE & SPIRITS

Shopfitting excellence

This is shopfitting with **KIND4stores**: strong design and the final touch in practical implementation. For all kinds of product ranges, small shops and large stores, food and non-food. From the smallest space to the biggest sales floor. Whether standard components or bespoke designs, we'll find the solution for you!

Our primary goal is to guide our retail customers to success in their business. Many of them have been fitting out their shops with our trend-setting solutions for decades. Most **KIND4stores** products are made in Germany, the rest in Central Europe. This means short distances and reliable planning, which are more important today than ever before.

Since 2023, **KIND4stores** has been busy merging the shopfitting activities of König Object Consulting, HARRES Metall-design, Otto Kind and ZOK-system. Under the umbrella of NWI (Frankfurt), the shopfitting group brings together planning expertise, modular shopfitting systems, customised furniture construction and high production capacities made in Germany.

www.KIND4stores.com

The flagship department

Wine should be flavourful, of good quality and have character. What customers expect from a good glass of wine also applies to the design of the sales area and product display.

Apart from the fruit and vegetables department, wine and spirits is one of the fields where local retailers can impress customers with proven expertise and a distinctive image. The focus is on a range of goods that represents sophistication, joie de vivre, and lifestyle – a great opportunity to make the wine and spirits department your flagship and let the entire store benefit from its allure and reputation.

New growth by volume

Private households in Germany spent around 25.31 billion euros on wine and spirits in 2023, thus exceeding the pre-pandemic level of 2019. Analysts expect the market segment to grow by approx. 30% to a volume of over 33 billion euros by 2027. Among classic wines, white wine is becoming more and more popular, and consumers are increasingly turning to apple and other fruit wines. In the spirits corner, vodka and semi-bitter liqueurs are the favourites. Customers are also increasingly interested in cocktails, aperitifs and mixed drinks.

Source: Statista

To your health: enjoy more consciously!

Customer expectations are on the rise, even though the German market remains price sensitive. Many consumers are willing to spend money on trendy or artisan regional products from higher priced segments. As the awareness for health and nutrition increases, so does consumers' tendency to reach for high-quality products. Their motto when it comes to food and drinks: less of better is more.

Seeing and experiencing quality and exper

When selling wine and spirits, creating a tasteful, welcoming atmosphere is key. But there's more to it than that. At **KIND4stores**, we specialise in going one step further: our storefitting makes the quality of the goods on display and the professional expertise involved in selecting the product range both visible and tangible.

The systems made by **KIND4stores** give the wine and spirits department its own distinct image. It impresses customers with a well-balanced range of products, special ambiance, and a unique shopping experience.

Sales outlets that have identified and realised this potential with **KIND4stores** win new customers and increase the loyalty of regulars. Their sales benefit from considerably higher space productivity in a dynamic market segment.

Store Journey – clearly structured and inspiring

When entering the wine and spirits department, many customers are overwhelmed and have difficulty finding their way through the maze of bottles. That's why **KIND4stores's** shopfitting systems rely on visibly clear structuring and presentation of the specific categories. Everything is aimed at guiding customers through their store journey, directing them subtly and inspiring them.

Informing, communicating, tasting

Product expertise in putting together the product range is not enough to be successful in sales. Consumers searching for premium products they wish to consciously enjoy are looking for information, expert advice, and to share their experiences. Hence, the wine and spirits department is also a place of communication. Retailers who succeed in making their selection of products at the POS an experience have more success selling them. The shopping experience anticipates the pleasures to come, especially considering that wine is a natural product which offers an incredible diversity.

Our shopfitting systems are extremely flexible, variable, and mobile, allowing for optimum information and communication.

KIND4stores's display unit systems provide various possibilities for purchasing advice directly on the shelves. The options for effectively integrating messages include digital media for storytelling about wine regions, grape varieties, vineyards and distilleries. Interactive terminals enable customers to access information on ingredients, production and origin.

Good reasons to crack open a bottle (or two)

One of the many ways to showcase different product groups effectively is through designing the store and shelving by occasion: brandy, whisk(e)y or gin to enjoy in the evening, alone or in twos, aperitifs or digestifs to offer dinner guests, wine and sparkling wine for a celebration or party.

Apart from the effects created by distinctive shelving systems, visual navigation in the sales area includes decompression zones, such as promotional areas for special occasions, holidays, or seasonal topics like Mediterranean drinks specialities. The versatile shelving systems by **KIND4stores** can be used in a variety of ways, for example, to professionally integrate bottles, bag-in-box packaging, cardboard boxes, tap stations for open wines, and special kinds of display such as shop-in-shop solutions. This also includes the horizontal presentation of selected wines.

ENJOYING (WINE) SHOPPING WITH ALL YOUR SENSES

Room for tasting experiences

As the proof of the wine is in the drinking, we are happy to incorporate tasting opportunities in your store. The spectrum ranges from tasting machines to degustations presented by a sommelier.

KIND4stores's display unit systems can be modified according to your current needs, for instance, when you quickly need to create a space for a special event like tasting evenings with local winegrowers.

Shopping with the senses

Even if the focus is on the sense of taste in the wine and spirits department – an ambiance that all the senses find pleasant is key. This includes a coordinated lighting concept that puts products in the right light on the one hand and creates a feel-good atmosphere with rather reduced warm light on the other. Passive sound and scent concepts can also help to increase the time customers spend in the store.

Additional recommendations, special services

Room for cross-selling and upselling

KIND4stores's shopfitting systems offer very flexible solutions for the presentation and arrangement of an extended range of goods. The sale of items beyond the core range can ensure a strong increase in turnover.

Customers who are interested in good wines are very likely to enjoy good food and deli products as well. In addition, gourmets value fine tableware: glasses, knives, napkins, candles, and tasteful decorations.

Both, cross-selling and upselling, will make for higher amounts on checkout receipts. Customers are more likely to reach for the “better” alternative or a bundle with added value if these are cleverly placed and staged.

Classy display cabinets for fine wines

Modern shopfitting design highlights the character of wines, sparkling wines, and spirits. The most valuable specialities can be staged in display cabinets by **KIND4stores** that can be harmoniously integrated into the display unit system. The high-class selection attracts connoisseurs who are not necessarily concerned about the price. The fine wines are attractively displayed – well protected behind lockable glass doors.

OUR RECIPE FOR SUCCESS: IT'S ALL IN THE MIX!

This brochure contains only a small selection of the **KIND4stores** solutions for wine & spirit displays.

We would be pleased to advise you personally and give you an idea what your specific market could look like.

Our experts look forward to discussing options with you!

Ordering information | Colour key

Ordering information

The shop fitting system for wine and spirits offers a wide range of elements with many combination and design options, including range-specific additions.

To make it as easy as possible for you to select and put together your desired configuration, here are some notes on dimensions, abbreviations and colour keys:

- All dimensions indicated in this catalogue are nominal dimensions.
- All dimensions are indicated in millimetres
Example: D570 = depth 570 mm, H2200 = height 2200 mm
- Please refer to the table on the right for abbreviations/short names

Abbreviations/short names:

L	Length
H	Height
D	Depth
AS	Axle size
SL	Heavy-duty
VS	In front of upright
BU	Between uprights
ZRW	Central back panel
ZRDW	Central back panel, wire
W&S	Wine & spirits

Colour key

The **HK**system units are available in the following **RAL standard colours**. Simply add the four-digit colour code of our RAL colour key to the item numbers of the **HK**products in your order.

Example: HK25item in RAL 7016 (anthracite grey)

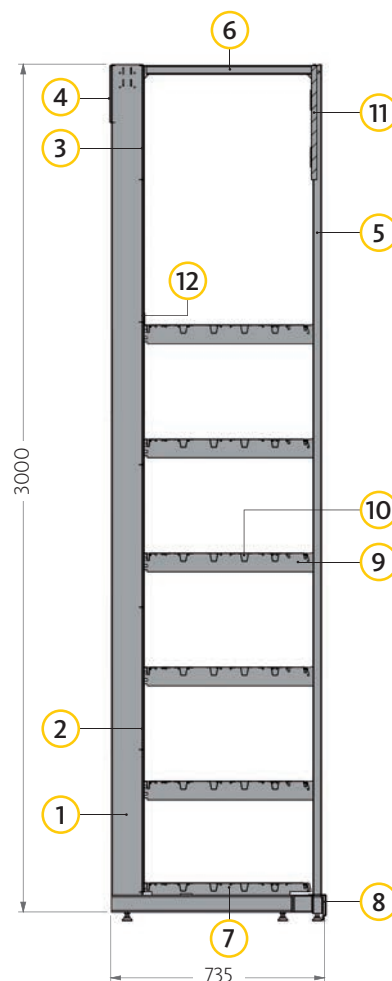

Item number + colour code addition number
= C100020-2377

Naturally, we are also happy to fulfil special colour requests and will be pleased to advise you.

HK25 – RAL standard colours		Colour code addition number
RAL 7016	Anthracite-grey	-2377

ACCESSORIES

WINE PROMOTION TABLE | with accessories | examples

Pretty agile: The wine promotion table can be quickly rearranged and extended as needed, providing a large number of flexible options to showcase beverages effectively: with seasonal references or related to various occasions such as barbecues, Christmas punch or cocktail hour.

The bench and table combination of this multi-functional element entices consumers to stay for wine tasting.
